WHEN CALL THE MIDWIFE premiered in England, it became the highest rated drama debut in BBC history. The critically acclaimed series became a favorite with American audiences as well when it debuted on THIRTEEN last September. Based on the bestselling memoirs by Jennifer Worth, it tells colorful stories of midwifery and families in 1950s post-war London, following new midwife Jenny Lee and the midwives and nuns at Nonnatus House as they minister to expectant mothers in the poorest area of the city.

The earnest but sheltered Jenny, the eternally stern Sister Evangelina, and the fabulously glamorous Trixie Franklin are among the characters who have captured viewers’ hearts in the States and abroad. Season Two begins this month, delivering more births, babies, and bicycling, plus blossoming romance from an unexpected corner.

THIRTEEN spoke with Jessica Raine (Jenny), Helen George (Trixie), and Pam Ferris (Sister Evangelina) about their work on the series.
Why do you think Call the Midwife is so popular with contemporary audiences?

JESSICA RAINÉ: The stories are full of humanity and transport people to a world that is so unique and so different from the world we live in today. I love that we focus on women’s stories you really don’t see anywhere else on television, featuring strong, well-defined female characters who support each other instead of competing with each other. The program is also unique in that it has elements of nostalgia, but is also quite gritty, with storylines that challenge and respect the audience.

HELEN GEORGE: I think part of the show’s success stems from great writing, first with Jennifer Worth’s memoirs—which were extremely popular in England even before we began work on the series—and then with Heidi Thomas’s wonderful scripts. We also have an amazing design team who pays an extraordinary amount of attention to period detail and a cast that works well together. When we’re together, there’s chemistry. I like to think some of that magic comes across on the screen.

PAM FERRIS: The whole concept of birth is about as fundamental as you can get and to my knowledge, no one has used it as a dramatic event. It has all the elements of drama. It has suspense, it has crises, it has pain, it has joy, and an outcome of some sort. As an event, it is inherently dramatic, and we seem to have harnessed that.

What insights have you gained about life in post-war London—especially women’s lives during that era—from working on the series?

JR: I didn’t realize how poor London was after World War II. I didn’t know, for example, that rationing continued 12 years after the war ended. I didn’t realize the depth of poverty that existed, especially in the East End—and the lack of contraception was astounding. In some cases, women had a dozen children. In fact, one of the episodes in the first season focused on a woman who had 24 children. People gasped at that and thought it wasn’t true, but it came directly from the memoirs.

HG: My answer is quite a practical one: these women were the original recyclers. We think the concept of recycling is a modern notion, but through necessity they had to recycle. They didn’t have baby wipes, they had nappies and towels they had to wash again and again. Nothing was thrown away. Even the mattresses the women gave birth on at home would be lined with newspaper or plastic covers so they could be preserved.

PF: I think it’s interesting to look at the time just before a revolution. The Beatles happened in the early 60s, The Pill happened in the early 60s, teenagers were invented in the early 60s, and our series takes place before all that. Women’s roles were in flux. They were fermenting. Women were shaking up their roles quite dramatically and grasped the revolution as it was about to emerge. It’s fascinating to look at that very fertile, very volatile period.
